

Applied NLP Project – Submission Guideline

As part of the final project, each group is required to implement the project based on its proposal. The submission process and required format are described below.

Report:

The LaTeX template for the final report is provided as a ZIP file. You may upload it to Overleaf and begin writing your report.

Project Submission Guidelines:

1. Keep your implementation (dataset, code, config files, etc.) in a Google Drive directory.
2. Add a README file explaining what each directory/file contains.
3. Rename the directory using your group number. For example, if your group number is 1, name the directory GROUP_1.
4. Make sure the directory is set to public access.
5. Only one member of the group is required to submit the Google Drive URL, the final report (in PDF format), and a signed copy of the submission checklist (in PDF format) on Brightspace.
6. Each member of the group is required to write and submit a short paragraph describing their contributions to the team project, including implementation, testing, and report writing, and specifying the sections they led.
